

In time, the nonstick finish may darken over the heating element. This is normal and will not seriously affect the release properties of the surface. To remove this discoloration, use a commercial cleaner designed for cleaning nonstick surfaces. These cleaners are available at most grocery and hardware stores. For best results, follow the manufacturer's instructions, being careful that any cleaning solution coming in contact with the exterior of the appliance is wiped off. After treating the griddle with a commercial cleaner, it is recommended that the cooking surface be wiped lightly with a cooking oil before using.

The outside finish of the griddle is easy to keep attractive and looking new. Simply wipe away spills and drips as they occur. If food should happen to burn on, it is easily removed with warm, sudsy water and a dish cloth. Any food residue remaining can be whisked away with a gentle stroke of a nylon mesh pad. Rinse and wipe dry.

IMPORTANT: To insure continued accuracy of the heat control, avoid rough handling in use and storage. Any maintenance required for this product other than normal household care and cleaning, should be performed by our Factory.
