Soap and Water

- Wet your hands with clean, running water, and apply soap.
- Lather your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.
- Scrub your hands for at least 20 seconds—the friction of your hands rubbing together helps remove the germs.
- Rinse your hands under clean, running water and use a clean towel to turn off the water. Touching the faucet with your freshly washed hands will re-contaminate them- faucet handles are considered “dirty”.
- Dry your hands using a clean towel or allow them to air dry.

Hand Gel

- Make sure you are using a hand gel with at least 70% alcohol content.
- Apply a dime size of the gel product to the palm of one hand.
- Rub your hands together.
- Rub the sanitizer over all the surfaces of your hands and fingers until your hands are dry (about 20 seconds).
- Do NOT rinse or wipe off the hand sanitizer before it’s dry; it kills bacteria as it dries. And remember, hand gel does not kill MRSA, Norovirus, and C.difficile.
