

Installation Guide

GSB8 & GSB12 In-Ground Landscape Subwoofers

CAUTION: Installation must be done by qualified persons using safe installation standards.

The installer is responsible for proper selection and use of hardware and to install the speakers in a safe and durable manner.

Wire Connection

- **CABLE**— The GSB speakers come with a captive multi-conductor 1-meter-long cable with bare-wire ends for connection via an external installer-provided weather-proof junction box.
 - **Connection Method** — Use professional wire nuts or other safe, long-term connectors that are appropriate for the installation conditions and that are sized properly for wire gauge(s) and for the number of wires to be connected together in the connector.
 - **Important:** Cut off all unused wires in a way that ensures that none of them will short to any of the other wires.
 - **⚠ Code Requirements** — Typical wiring entails protected connections inside installer-provided water-proof junction box, with cable entering junction box via water-tight fitting that is sized appropriately for wire jacket diameter (see below). However, always wire in accordance with code requirements.
