Scaling Classroom Visits Across Your School and District *SMPTE Journal*, 1996 **The Technology-Ready School Administrator: Standards-Based Performance** Clinton Born, 2013 *The Technology Ready School Administrator* 2nd ed is an excellent resource for school leaders who understand that schools can run efficiently and cost effectively with various administrative technological tools but are not sure where to begin. Students of all ages in P-12 programming are wired for technology and this resource provides the tools to create a culture where administrators and staff encourage students to learn using technology in a responsible manner. Furthermore, Dr. Born presents numerous technology-related court cases and legal hearings to inspire thought-provoking discussions on how to effectively and legally manage difficult situations, including the issue of cyberbullying. Gretchen Combs, Adjunct Professor, Muskingum University; Pre-school special education teacher.

**Deliberation, Representation, Equity** Love Ekenberg, Göran Cars, Karin Hansson, Mats Danielson, 2017. What can we learn about the development of public interaction in e-democracy from a drama delivered by mobile headphones to an audience standing around a shopping center in a Stockholm suburb? In democratic societies, there is widespread acknowledgment of the need to incorporate citizens' input in decision-making processes in more or less structured ways. But participatory decision-making is balancing on the borders of inclusion, structure, precision, and accuracy. To simply enable more participation will not yield enhanced democracy, and there is a clear need for more elaborated elicitation and decision-analytical tools. This rigorous and thought-provoking volume draws on a stimulating variety of international case studies: from flood risk management in the Red River Delta of Vietnam to the consideration of alternatives to gold mining in Roanoke, Virginia; from the application of multi-criteria decision analysis in evaluating the impact of e-learning opportunities at Makerere University in Uganda to the application of multi-criteria decision analysis in evaluating the impact of e-learning opportunities at Makerere University. Editors: Love Ekenberg, senior research scholar, International Institute for Applied Systems Analysis (IIASA), Laxenburg; professor of Computer and Systems Sciences, Stockholm University; Karin Hansson, artist and research fellow, Department of Computer and Systems Sciences, Stockholm University; Mats Danielson, vice president and professor of Computer and Systems Sciences, Stockholm University; affiliate researcher, IIASA; and Göran Cars, professor of Societal Planning and Environment, Royal Institute of Technology, Stockholm. The book draws innovative collaborations between mathematics, social science, and the arts. They develop new problem formulations and solutions with the aim of carrying decisions from agenda setting and problem awareness through to feasible courses of action by setting objectives, alternative generation, consequence assessments, and trade-off clarifications. As a result, this book is important new reading for decision makers in government.
