**Aerospace**, 1995 Instruction Manual for Rotating Beam Ceilometer United States. Weather Bureau, 1956 A  
Philosophy of Technology Pieter E. Vermaas, 2011 In A Philosophy of Technology From Technical Artefacts to Sociotechnical  
Systems technology is analysed from a series of different perspectives The analysis starts by focussing on the most tangible  
products of technology called technical artefacts and then builds step wise towards considering those artefacts within their  
context of use and ultimately as embedded in encompassing sociotechnical systems that also include humans as operators  
and social rules like legislation Philosophical characterisations are given of technical artefacts their context of use and of  
sociotechnical systems Analyses are presented of how technical artefacts are designed in engineering and what types of  
technological knowledge is involved in engineering And the issue is considered how engineers and others can or cannot  
influence the development of technology These characterisations are complemented by ethical analyses of the moral status of  
technical artefacts and the possibilities and impossibilities for engineers to influence this status when designing artefacts and  
the sociotechnical systems in which artefacts are embedded The running example in the book is aviation where aeroplanes  
are examples of technical artefacts and the world aviation system is an example of a sociotechnical system Issues related to  
the design of quiet aeroplane engines and the causes of aviation accidents are analysed for illustrating the moral status of  
designing and the role of engineers therein Table of Contents Technical Artefacts Technical Designing Ethics and Designing  
Technological Knowledge Sociotechnical Systems The Role of Social Factors in Technological Development Ethics and
