

Nature vs. Nurture

- One of the greatest areas of controversy in the study of human behaviour is the **nature-nurture debate**.
- **Nature argument** – behaviour is determined by our inherited, genetic structure. It is also called *innate* behaviour.
- **Nurture argument** – behaviour is the result of learning and experience resulting from outside factors such as parents, media, peers and religion. It is also called *learned* behaviour.

Manual ,1915 **Examination Papers** University of Toronto,1923 Seeing Nature Through Gender Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred bobbies Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet *Classified Catalogue of the Carnegie Library of Pittsburgh. 1907-1911* Carnegie Library of Pittsburgh,1914 **Nature** Sir Norman Lockyer,1916
