Note: The term digestion can be used two different ways. We commonly use it to refer to all events associated with food processing, which includes taking in food, breaking it down, absorbing the nutrients, and then excreting the waste. But importantly it has a specific meaning when related to chemical digestion or mechanical digestion. It represents the second of the four steps involved in food processing and is specifically about the breakdown process. This is the process we are focused on below- the breakdown process.

1. How many organs make up the digestive system? **Answer Several organs**
2. How many different specialized cells are part of the digestive system? **Answer enzyme secretion, absorption, and mucus production.**
3. What is the overall function of the digestive system? **Answer (hint: need 2 functions) both mechanical and chemical digestion.**
4. Name three other products in addition to vitamins, that result from the breakdown of food? **Answer minerals, amino acids (protein building blocks), and glucose (a sugar derived from carbohydrates).**
5. What is the function of the gastrointestinal tract? **Answer physical and chemical breakdown of food, as well as the absorption of nutrients into the bloodstream.**
