1.	Responsibility of the subscriber.	Comparatively less as the subscriber is simply to tell the number to the operator. As regards the progress of the call, the subscriber gets straight forward reply from the operator, such as line engaged, number unobtainable etc.	A subscriber has to be educated as to how to dial. He should also be familiar with the various tones.
2.	Access	Where as Manual operator has direct access via the multiple of every subscriber in the exchange.	In an Automatic exchange, of the step by step type of calls have normally to be routed through several ranks of selection.
3.	Possibility of getting a wrong number.	Much higher, as the operator may hear wrongly and again connect wrongly.	Very much less.
4.	Quality of service.	The service gives scope to the operator to show favouritism.	The service is uniform all throughout the day and night.
5.	Privacy.	If the operator wishes, he can over hear the conversation.	The conversation cannot be overheard without introducing additional circuits.
6.	Traffic handling capacity.	In a Manual exchange it takes more time to complete the establishment of a call, when all the card circuits are engaged.	The Auto exchange establishes a connection much faster. It handles a larger number of calls per minute in the busy hour.
