

Chapter 7 - Decoding Chemical Formulas

As you briefly mentioned in a previous lesson, the chemical composition of a given compound is usually represented by a chemical formula.

- The formula indicates the constituent elements and the number of atoms of each element written as a subscript. This is the "atomic per formula unit," or apfu.
- For example, gold uses the number-10, oxygen uses-8, and silver uses-10.
- Each element abbreviation starts with a capital letter, and if a second letter is present it will always be lowercase.
- These letters are combined numerically together into a single formula with no spaces and no special effects are normally applied (bold and underline only).

Consequently, a formula is simply "10" and then two silver atoms per formula unit.

Using page 206 from a simple formula as well, "AuCl₂", consisting of 1 silver atom and 2 chlorine atoms per formula unit.

Using the formula as Proust's Gold (page 187) has the formula "AuCl₃", consisting of 1 atom of gold and 3 atoms of chlorine per formula unit.

Sometimes with an example that you could describe in the book formula, as in the given which belongs to the other "group of elements" (page 206), "Au₂Fe₂Si₂Cl₂".

In that case there is 2 Au, 2 Fe, and 2 of the other two per formula. This is called a unit formula (page 20) and follows the other two in the book except up to 2 atoms per formula unit.

The Phases and Measures of Charge Neutrality:

All compounds, including all minerals, must be charge neutral.

This means that every positive charge must be balanced by a negative charge. Most that means have a negative charge and others have a positive charge.

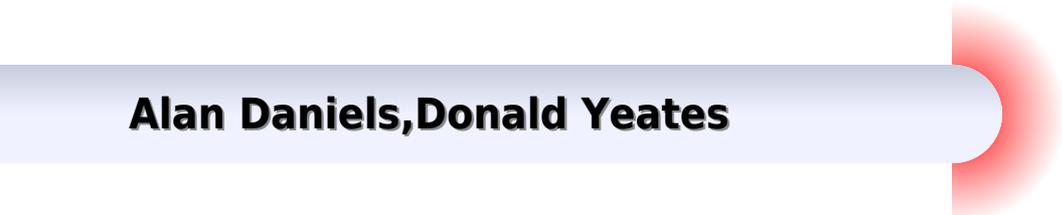

Identifying charge neutrality:

1. Quartz, SiO₂, is composed of 1 Si cation which has a valence of +4 and two O anions, each of -2 charge.
2. Pyrite, FeS₂, is composed of two Fe (+2) cations, and two S (-2) anions and two S (-2) anions.

The concept of charge neutrality is important to understanding mineral substitution in rocks and their formation from a given mineral, and will be discussed later in the Lecture.
