# Life Processes

1984C005

### Notes

**H**ow do we tell the difference between what is alive and what is not alive? If we see a dog running, a cow grazing, or a man shouting loudly on the street, we know they are living beings. What if the dog or the cow or the man were asleep? We would still think that they were alive, but we know that they are not. How do we know they are alive? We know that they are alive because they show signs of life.

## Class 10 Science (Biology)

Do you know why some plants have leaves of colours other than green? They grow over time, so we know that they are alive, some will say. In other words, we know that they are alive because they show signs of life.
