### **CHAPTER: PROTISTS & FUNGI**

#### **Question & Answer Notes**

##### **Part-2**

#### **Q) Why fungi are classified as a separate kingdom?**

According to the five kingdoms system of classification, fungi is now a separate kingdom.

##### Fungi are different from plants as

- i) Fungi have no chlorophyll.
- ii) Fungi never have flagella.
- iii) Fungi are saprotrophs

##### Fungi are different from animals as

- i) Fungi have cell walls
- ii) are absorptive heterotrophs
- iii) are non-motile.

So fungi are neither plants any animals. They show nuclear mitosis. Because fungi are distinct from plants, animals, and other eukaryotes in many ways, they are assigned to separate kingdom fungi.

#### **DIVERSITY AMONG FUNGI**

The kingdom fungi are a diverse group of more than 10000 known species most of which are terrestrial. Fungi are mostly multicellular eukaryotes of varied structures that share a common mode of nutrition.

### **Concepts of Medicine & Biology Parent Lesson Plan**

,2013-08-01 Concepts of Medicine and Biology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Medicine From surgery to vaccines man has made great strides in the field of medicine Quality of life has improved dramatically in the last

few decades alone and the future is bright But students must not forget that God provided humans with minds and resources to bring about these advances A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury In Exploring the History of Medicine author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God The fascinating history of medicine comes alive in this book providing students with a healthy dose of facts mini biographies and vintage illustrations Semester 2 Biology The field of biology focuses on living things from the smallest microscopic protozoa to the largest mammal In this book you will read and explore the life of plants insects spiders and other arachnids life in water reptiles birds and mammals highlighting God s amazing creation You will learn about biological classification how seeds spread around the world long term storage of energy how biologists learned how the stomach digested food the plant that gave George de Mestral the idea of Velcro and so much more For most of history biologists used the visible appearance of plants or animals to classify them They grouped plants or animals with similar looking features into families Starting in the 1990 s biologists have extracted DNA and RNA from cells as a guide to how plants or animals should be grouped Like visual structures these reveal the underlying design of creation Exploring the World of Biology is a fascinating look at life from the smallest proteins and spores to the complex life systems of humans and animals *Just the Facts: Life Science, Grades 4 - 6* Steve Rich, 2007-01-01 With a solid foundation of basic science knowledge and a basic understanding of concepts and vocabulary students will be prepared for higher order thinking and inquiry based activities Back cover [\(Free Sample\)](#)
