gene expression T helper cell 1 (MIDGE-Th1®) vectors coding for Interleukin 12 and -18 in combination with the transfection agent SAINT-18 have systemic antitumoral effects on equine melanomas Kathrin Mählmann, 2012-11-23

Equine melanomas are the most common neoplasms in older grey horses. Until now, no curative therapy is established. Xenogenic DNA vaccination represents a promising therapeutic approach. Goal of the present study was to evaluate the safety and clinical efficacy of vaccination of grey horses with naturally occurring melanomas with MIDGE Th1 vectors encoding for equine eqIL12 and eqILRAP IL18 alone or in combination with human gp100, hgp100 or human tyrosinase htyr. Three groups, each n = 9 of adult grey horses with variable numbers of melanomas, received three intramuscular and three intradermal peritumoral vaccinations. Each group was treated with MIDGE Th1 vectors coding for eqIL12 and eqILRAP IL18. One group (gp100) was additionally treated with 500 µg hgp100, MIDGE Th1, and one group with 500 µg htyr, MIDGE Th1 (tyr). The third group did not receive additional DNA (IL12/18). Vectors were complexed with the transfection agent SAINT 18. The injections were performed on days 1, 22, and 78 intradermally around one selected melanoma, locally treated melanoma, and intramuscularly as a systemic treatment. A general examination of the horses and evaluation of local reactions at the injection site were performed daily during hospitalisation on the day of each injection and 3 days after each injection, as well as on day 120. In each horse, the locally treated melanoma and up to 8 non-locally treated melanomas were measured before each injection and on day 120 by calliper and ultrasound. The relative volumes were calculated in relation to day 1 (100%). For the evaluation of the generation of specific CD8 cytotoxic T cells against hgp100 and htyr, peripheral blood mononuclear cells (PBMCs) isolated before each injection and on day 120 were stimulated in vitro with autologous dermal cells transfected with hgp100 or htyr. Interferon (IFN) as a response to this specific stimulation was measured by intracellular immunofluorescence staining. Specific serum antibodies against hgp100 and htyr were measured at equivalent time points as cytotoxic T cells using a cell-based flow cytometric assay. Human embryonic kidney cells transfected with hgp100 or htyr served as a source for antigens. The only consistent abnormal finding upon clinical examination of the treated horses was an increased body temperature. A significant increase in body temperature (38.7–0.59 °C) was recorded after 40 of the 81 injections and usually lasted for one day. Local inflammatory reactions and depigmentation were observed in all groups starting at day 3 after the first application. The relative tumor volume (%) was significantly reduced to 71.5–29.73% (calliper measurements) and 87.0–24.42% (ultrasound measurements). There were no significant differences detected between groups gp100, tyr, and IL12/18. No difference was seen in reduction of tumor volume between locally treated and non-locally treated melanoma. Neither a cellular nor a humoral immune response against the vaccine antigens could be detected. In this study, treatment with eqIL12 and eqILRAP IL18 DNA in combination with SAINT 18 showed a systemic effect against grey horse melanoma. There was no additional clinical or immunological effect observed by vaccination with MIDGE Th1 vectors encoding hgp100 and htyr. It remains unclear whether the antitumoral effect was caused by the interleukins, unmethylated CpG motifs, or the induction of

an immune reaction by the combination of DNA and transfection reagent Reasons for the absence of a specific immune response may be an inadequate selection of dosages or treatment interval It is also possible that the sensitivity of the immunoassays was too low to detect a subclinical immune response Further studies to characterize the antitumoral effects of the treatment used in this study and modifications of the treatment protocol to achieve a potential specific immune response are warranted

Medieval Manuscripts for Mass and Office Andrew Hughes, 1995-01-01 Many books discuss the theology and doctrine of the medieval liturgy there is no dearth of information on the history of the liturgy the structure and development of individual services and there is much discussion of specific texts chants and services No book at least in English has struggled with the difficulties of finding texts chants or other material in the liturgical manuscripts themselves until the publication of *Medieval Manuscripts for Mass and Office* in 1982 Encompassing a period of several centuries ca 1200 1500 this book provides solutions for such endeavours Although by this period the basic order and content of liturgical books were more or less standardized there existed hundreds of different methods of dealing with the internal organisation and the actual writing of the texts and chants on the page Generalization becomes problematic the use of any single source as a typical example for more than local detail is impossible Taking for granted the user's ability to read medieval scripts and some codicological knowledge Hughes begins with the elementary material without which the user could not proceed He describes the liturgical year season day service and the form of individual items such as responsory or lesson and mentions the many variants in terminology that are to be found in the sources The presentation of individual text and chant is discussed with an emphasis on the organisation of the individual column line and letter Hughes examines the hitherto unexplored means by which a hierarchy of initial and capital letters and their colours are used by the scribes and how this hierarchy can provide a means by which the modern researcher can navigate through the manuscripts Also described in great detail are the structure and contents of Breviaries Missals and the corresponding books with music This new edition updates the bibliography and the new preface by Hughes presents his recent thoughts about terminology and methods of liturgical abbreviation
