Bear Versus Shark: What Would You Choose?

Indent First Line of Each New Paragraph (Use Tab Key)

"Would you rather lose your sense of sight or your sense of hearing? Would you rather lose an arm or a leg?" Such questions often crop up in classroom ice breaker and party games, and they force people to consider unthinkable situations and make uncomfortable decisions. Perhaps the world's least known, yet most controversial, "would you rather?" question is this: "Would you rather fight a blind bear or a toothless shark?" Ms. Phalen of Forest View High School has been asking this question since 2008, and this line of questioning has seldom failed to produce anything short of a heated debate. The naive tend to immediately choose the blind bear; however, the truly sage know that the best choice is the toothless shark.

First and foremost, in choosing a bear, one chooses certain death. Though the bear is blind, there are other senses to consider, including the sense of smell. Within the animal kingdom, bears are considered to have the most acute sense of smell, with a range that can be measured in miles ("Bear Series"). With this keen sense of smell, a bear does not even require the sense of sight during a fight; the bear could simply track the victim's movement using its nose. Moreover, a bear's ability to hear makes it an even more formidable opponent, as "hearing is the black bear's first line of defense against danger because they can hear in all directions (and/or smell) and they can hear farther than they can see in brushy forest" ("Series & Abilities"). This multidimensional sense only further increases their ability to detect an opponent

Even blind bears can spot great MLA style in a paper! But seriously, never try to fight one.
