Animal Vegetable Miracle:

Animal, Vegetable, Miracle - Tenth Anniversary Edition Barbara Kingsolver, Camille Kingsolver, Steven L. Hopp, Lily Hopp Kingsolver, 2017-05-02 A beautiful deluxe trade paperback edition celebrating the 10th anniversary of Barbara Kingsolver's New York Times bestseller which describes her family's adventure as they move to a farm in southern Appalachia and realign their lives with the local food chain. Since its publication in 2007, *Animal Vegetable Miracle* has captivated readers with its blend of memoir and journalistic investigation. Newly updated with original pieces from the entire Kingsolver clan, this commemorative volume explores how the family's original project has been carried forward through the years. When Barbara Kingsolver and her family moved from suburban Arizona to rural Appalachia, they took on a new challenge: to spend a year on a locally produced diet, paying close attention to the provenance of all they consume. Concerned about the environmental, social, and physical costs of American food culture, they hoped to recover what Barbara considers our nation's lost appreciation for farms and the natural processes of food production. Since 2007, their scheme has evolved enormously. In this new edition, featuring an afterword composed by the entire Kingsolver family, Barbara's husband Steven discusses how the project grew into a farm-to-table restaurant and community development project training young farmers in their area to move into sustainable food production. Camille writes about her decision to move back to a rural area after college and how she and her husband incorporate their food values in their lives as they begin their new family. Lily, Barbara's youngest daughter, writes about how growing up on a farm in touch with natural processes and food chains has shaped her life as a future environmental scientist. And Barbara writes about their sheep and how they grew into her second vocation as a fiber artist and reports on the enormous response they've received from other home growers and local food devotees. With Americans ever growing concern over an agricultural establishment that negatively affects our health and environment, the Kingsolver family's experiences and observations remain just as relevant today as they were ten years ago. *Animal Vegetable Miracle* is a modern classic that will endure for years to come. Cogent and illuminating, without sentimentality, this book captures the pulse of the farm and the deep gratification it provides, as well as the intrinsic humor of the situation. Animal, Vegetable, Miracle Barbara Kingsolver, Camille Kingsolver, Steven L. Hopp, 2009-10-13 Barbara Kingsolver tells students about her family's adventure as they move to a farm in southern Appalachia and spend a year on a locally produced diet, realigning their lives with the local food chain and paying close attention to the provenance of all they consume. In that year, they find themselves eager to move away from the typical food scenario of American families: a refrigerator packed with processed, factory-farmed food transported long distances using nonrenewable fuels, and in their search for another way to live and eat, they begin to recover what Kingsolver considers our nation's lost appreciation for farms and the natural processes of food production.

shopping goal was to get our food from so close to home we'd know the person who grew it. Often that turned out to be ourselves as we learned to produce what we needed starting with dirt, seeds, and enough knowledge to muddle through. Or starting with baby animals and enough sense to refrain from naming them.

ABOUT THE BOOK: We wanted to live in a place that could feed us where rain falls, crops grow, and drinking water bubbles up right out of the ground. It's hard to categorize *Animal, Vegetable, Miracle* by Barbara Kingsolver, Camille Kingsolver, and Stephen Hopp. The book is a result of a year-long project where Kingsolver, her husband Stephen, and her two daughters Camille and Lilly eat food either grown themselves or locally produced. In addition to firsthand accounts recounting the trials and tribulations of raising their own food, including turkeys, this book serves as a how-to manual for those interested in embarking on a similar journey and provides a strong social commentary about the current state of the food system in the United States.

MEET THE AUTHOR: Kate Kastelein has over 10 years of experience writing, researching, and editing articles, eNewsletters, web content, press releases, and resource books. She's a huge nerd and is interested in everything from science and the latest technology to crafts, food, and celebrity gossip. Kate's a native Mainer, and when she's not shoveling snow or writing, she's huddled near the fire with her daughter, husband, and dogs.

EXCERPT FROM THE BOOK: Because of the amount of travelling, food must do many conventional growers choose produce for durability rather than taste. Most fruit is picked before it has ripened, which it does on the road instead of on the vine. Since produce grown by local farmers or by yourself travels very short distances, it can be harvested when ripe. This allows for maximum taste and nutrition.

Meat is another story altogether. *Animal, Vegetable, Miracle* points out the horrors of CAFOs where animals are packed tightly together in horrible conditions for their entire lives. At best, they are fed grains saturated with hormones and antibiotics, and at worst, things like sawdust. During their year of sustainable eating, Kingsolver's family eats meat raised by responsible local farmers who treat their animals well, allow them plenty of space to roam, eat grass, and live much happier lives than their factory-farmed counterparts.
