Computation and Control Claire J. Tomlin, Mark R. Greenstreet, 2003-07-31 This book constitutes the refereed proceedings of the 5th International Workshop on Hybrid Systems Computation and Control HSCC 2002 held in Stanford California USA in March 2002 The 33 revised full papers presented were carefully reviewed and selected from 73 submissions All current issues in hybrid systems are addressed including formal models and methods and computational representations algorithms and heuristics computational tools and innovative applications *Smoothing, Forecasting and Prediction of Discrete Time Series* Robert Goodell Brown, 2004-01-01 Computer application techniques are applied to routine short term forecasting and prediction in this classic of operations research The text begins with a consideration of data sources and sampling intervals progressing to discussions of time series models and probability models An extensive overview of smoothing techniques surveys the mathematical techniques for periodically raising the estimates of coefficients in forecasting problems Sections on forecasting and error measurement and analysis are followed by an exploration of alternatives and the applications of the forecast to specific problems and a treatment of the handling of systems design problems ranges from observed data to decision rules 1963 ed

Agents, Games, and Evolution Steven Orla Kimbrough, 2011-12-19 Games or contexts of strategic interaction pervade and suffuse our lives and the lives of all organisms How are we to make sense of and cope with such situations How should an agent play When will and when won't cooperation arise and be maintained Using examples and a careful digestion of the literature *Agents Games and Evolution Strategies at Work and Play* addresses these encompassing themes throughout and is organized into four parts Part I introduces classical game theory and strategy

selection It compares ideally rational and the naturalist approach used by this book which focuses on how actual agents chose their strategies and the effects of these strategies on model systems Part II explores a number of basic games using models in which agents have fixed strategies This section draws heavily on the substantial literature associated with the relevant application areas in the social sciences Part III reviews core results and applications of agent based models in which strategic interaction is present and for which design issues have genuine practical import This section draws heavily on the substantial literature associated with the application area to hand Part IV addresses miscellaneous topics in strategic interaction including lying in negotiations reasoning by backward induction and evolutionary models Modelled after the authors Agents Games and Evolution course at the University of Pennsylvania this book keeps mathematics to a minimum focusing on computational strategies and useful methods for dealing with a variety of situations
