Lab 3, Experiment 1

Directions to complete Experiment 1:

- 1) Read and complete each procedure step for Lab 3, Experiment 1 Compounding and Packaging a Powder found in your eScience Lab Manual and record in "Table 1: Powder Mass" record the Total Powder Mass (g) and Total Mass / 5 (g).
- 2) Record the observations notes you recorded in Table 1 in your manual to the table below.
- 3) Answer the four (4) post lab questions.

Table 1: Powder Mass

Total Powder Mass (g)	Total Mass / 5 (g)
20.4 g	4.08 g

1. Why is it important to blend the powders using the "doubling" technique, rather than simply blending all of the powdered ingredients together at the same time?

It is important to blend the powders using the "doubling technique because it makes a homogenous mixture.

2. Why do all of the tablets need to be triturated separately?

The tablets need to be triturated separately because you need to know just how many grams per instance of the medication and how strong to make the medication.

3. What purpose does the sieve serve after trituration?

The sieve removes any chunks, so the final product is purely powder.

4. What kind of mortar and pestle is most ideal for this type of procedure; glass, porcelain, or Wedgwood?

Why do you think this is so?

Porcelain, it has the best surface and made crushing the smarties really easy. You are also not supposed to use wood for triturating tablets.

Crowder,Mary Durant,1996-08-01 Our goal in writing this laboratory manual was to provide lab information and activities for a comprehensive study of biological diversity in a freshman biology course taken by both majors and non majors We have tried to include organisms that are interesting as well as those that show major anatomical physiological reproductive behavioral and ecological features within all Kingdoms Living specimens are included in several of the lab activities Preface

Life in the Natural World Steve L. O'Kane,Kimberly Cline-Brown,2016-06-16 In this collection of laboratory investigations we have chosen to follow Darwin s lead by highlighting some of the many forms of life s biological diversity and complexity and there are many Biological evolution after all is an extremely creative process You ll be examining diversity and complexity from the level of DNA to that of species and finally to how species are assembled into communities and how these communities are studied You ll also be looking at some of the important mechanisms and natural systems that underlie maintain and change biological diversity It is not much of an exaggeration to say that life as we know it in all its myriad and beautiful forms is about variation and interaction These labs are designed to be stand alone activities that are primarily self directed You will find that your instructor will teach much less than you may be used to Think of your instructor as a facilitator or as a resource for learning the real learning is up to you Said differently the degree of learning you accomplish while conducting these investigations is almost entirely dependent on the effort you put into them inside and outside the laboratory [Loss of Biological Diversity](#) National Science Board (U.S.).
