PORTABLE BATTERY OR A.C. OPERATION

- Your calculator is operated by using a 9 volt battery. Under normal operating conditions, a new 9 volt carbon zinc battery will provide about 14 to 20 hours of calculating time. A new 9 volt alkaline battery will provide about 40 hours of calculating time.
- To replace a battery, slide the battery cover off the battery compartment, and CAREFULLY remove the battery. The battery cover is located on the underside of the calculator. Hold the battery in one hand and CAREFULLY remove the battery connector. Drop it over battery into the connector, replace in the battery compartment and slide the cover back in place.
- When the battery is almost discharged, the display will become dim. To prevent improper calculations, the battery must be replaced as soon as possible.
- Note: To prevent damage to your calculator, remove a bad battery. Do not store your calculator for extended periods of time with a battery in the battery compartment.
- To conserve battery life turn the calculator off when not in use.
- For A.C. operation, it will be necessary to use the optional A.C. adapter model 710 or 7015, designed specifically for this calculator. Turn the power switch off, connect the adapter to any convenient source of 110-120 volts A.C., and push the lock into the socket of the right side of the case. When the lock is inserted, the battery is automatically disconnected.

NOTE: Use of any A.C. adapter other than the one specifically designed for this calculator, may cause damage to the electronic circuits within the unit. See your Dealer for purchase of the proper A.C. adapter.
