Excerpts from FASAB Standard Number 6

Executive Summary

- a This statement contains accounting standards for Federally owned property, plant, and equipment (PP&E); deferred maintenance on PP&E; and cleanup costs. Each standard is summarized below.

Property, Plant, And Equipment

- b The Federal Government's investment in PP&E exceeds \$1 trillion [NOTE 1 Department of the Treasury, Financial Management Service, Consolidated Financial Statements of the United States Government prototype 1993, p. 23. The prototype statements provide gross historical cost investment amounts for all PP&E recorded by government entities. These amounts have not been audited.] PP&E used for many different purposes. "PP&E" is defined as follows:

Tangible assets that (1) have an estimated useful life of 2 or more years, (2) are not intended for sale in the ordinary course of business, and (3) are intended to be used or available for use by the entity.

- c The diversity among Federal PP&E creates a need for meaningful categories of PP&E with different accounting standards for each category. The Board identifies four categories of PP&E. The categories are:

- general PP&E are PP&E used to provide general government services or goods;
- Federal mission PP&E are PP&E exhibiting specific characteristics set by the Board;
- heritage assets are those assets possessing significant educational, cultural, or natural characteristics; and
- stewardship land [NOTE 2 Land acquired for or in connection with general PP&E would be included in that category. Land not associated
