

## DESCRIPTION AND OPERATION

### About this Manual

#### Introduction

This manual has been written in a format that is designed to meet the needs of Ford technicians worldwide. The objective is to use common formats and include similar content in each manual worldwide. This manual provides general descriptions for accomplishing service and repair work with tested, effective techniques. Following them will help assure reliability.

#### Replacement Parts

Ford and Motorcraft parts are made to the same exacting standards as the original factory fitted components. For this reason, it is recommended that only genuine Ford or Motorcraft parts are installed during service or repair.

#### Special Tools

The Special Tool(s) Table provided at the beginning of each procedure shows all special tools required to carry out a repair. Where possible, illustrations are provided to assist in identifying the special tool required.

Special tools may be ordered from:

<p style="text-align: center;">Australia  <b>SPX AUSTRALIA</b>            Tel: +61 (0)3 9544 5222            Fax: +61 (0)3 9544 5222</p>
--

#### Important Safety Instructions

Appropriate service methods and correct repair procedures are essential for the safe, reliable operation of all motor vehicles as well as the personal safety of the individual carrying out the work.

This manual cannot possibly anticipate all such variations and provide advice or cautions as to each. Anyone who departs from the instructions provided in this manual must first establish that he compromises neither his personal safety nor the vehicle integrity by his choice of methods, tools or parts.

#### Warnings, Cautions and Notes in This Manual

 **WARNING:** Warnings are used to indicate that failure to follow a procedure correctly may result in personal injury.

 **CAUTION:** Cautions are used to indicate that failure to follow a procedure correctly may result in damage to the vehicle or equipment being used.

**NOTE:** Notes are used to provide additional essential information required to carry out a complete and satisfactory repair.

As you read through this manual, you will come across **WARNINGS**, **CAUTIONS** and **NOTES**.

A warning, caution or note is placed at the beginning of a series of steps if it applies to multiple steps. If the warning, caution or note only applies to one step, it is placed at the beginning of the specific step (after the step number).

#### How to Use This Manual

This manual covers service and repair procedures. This manual is structured into groups and sections, with specific system sections collected together under their relevant group.

A group covers a specific portion of the vehicle. The manual is divided into five groups, General Information, Chassis, Powertrain, Electrical and Body and Paint. The number of the group is the first number of a section number.

Pages at the start of the manual list all sections available. Each section has a contents list detailing General Specifications, Description and Operation and Service Adjustment and Checks.

If components need to be removed or disassembled in sequence, the sequence will be identified numerically in a graphic and the corresponding text will be numbered accordingly (refer to 'Samples').

All left and right-hand references to the vehicle are taken from a position sitting in the driver seat looking forward.

All left and right-hand references to the engine are taken from a position at the flywheel looking towards the front camshaft pulley.

Where appropriate, instructions will be given for the use of WDS, diagnostic equipment.

Inspection and Verification

Visual Inspection Charts, Symptom Charts and other information charts (such as diagnostic routines), supplement test procedures with technical specifications, or navigate the user to a specific test procedure.

Symptom Chart

The symptom chart indicates symptoms, sources and actions to address a condition.

Pinpoint Tests

For electrical systems, pinpoint test steps are used to identify the source of a concern in a logical, step-by-step manner. Pinpoint tests have two columns: **CONDITIONS** and **DETAILS/RESULTS/ACTIONS**.

The **CONDITIONS** column is used exclusively for graphics and icons (with or without captions) and the **DETAILS/RESULTS/ACTIONS** column provides
