The Transnational Politics of Higher Education Meng-Hsuan Chou, Isaac Kamola, Tamson Pietsch, 2016-02-26 This edited volume introduces readers to the relationship between higher education and transnational politics. It shows how higher education is a significant arena for regional and international transformation as well as domestic political struggle replete with unequal power relations. This volume shows the causes and impacts of recent transformations in higher education within a transnational context. Emerging similarities in objectives, institutional set-ups and approaches taking place within higher education institutions across different world regions. The asymmetrical relations between various kinds of institutional, commercial and state actors across borders. The extent to which historical and colonial legacies are important in the transformation of higher education. The potential effects these developments have on the current structure of international political order. Drawing on case studies from across the Middle East, Asia, Africa, Latin America and Europe, the contributors develop diverse perspectives explaining the impact of transnational politics on higher education and higher education on transitional politics across time and locality. This book is among the first multi-disciplinary effort to wrestle with the question of how we can understand the political role of higher education and the political force universities exert in the realm of international relations.

Emiratization in the UAE Labor Market Georgia Daleure, 2016-09-29 This book combines classic and recent studies investigating challenges to Emiratization: full employment of Emirati nationals who make up only about 10% of the total workforce in the United Arab Emirates (UAE). The book offers a comprehensive overview of the events leading to the country's rapid growth and development as well as important social and cultural issues arising as the country transitioned from an isolated traditional economy to an open globalized one and explores the specific challenges of incorporating Emiratis in their own vibrant economy. This topic is of interest to scholars, policymakers and those considering investing or seeking employment in the UAE since it emerged as a Western-friendly, politically stable and prospering oil-producing country in a region plagued by political, social and economic turmoil.
