

WHAT IS AUTISM SPECTRUM DISORDER

Autism/autism spectrum disorder (ASD) is a condition that encompasses challenges with social skills, repetitive behaviours, speech and nonverbal communication.

The exact cause of ASD is unknown but is influenced by many genetic and environmental factors, science has confirmed that vaccines do not cause ASD.

1 IN 66

Canadian children and youth aged 5 to 17 are on the autism spectrum

THE SPECTRUM

The spectrum shows the 'traits' or different ways the brain processes information. ASD is not measured on a straight scale of not autistic to 'very autistic', for example, a person may experience sensory overload in loud and crowded places despite having great communication skills. Every person with ASD is different and they may function differently depending on the circumstances.
