  - *how people make decisions*
    - **People face trade-offs**
      - **Ex:** choosing btwn going to the cinema or working
    - **Cost of smtn is what you give up to get it**
      - **Ex:** during the time you were studying, attending classing you could have earned money working
    - **Rational ppl think at the margin**
      - **Ex:** when a firm decides whether to produce an extra unit of some good, it will always look at the cost of producing 1 extra unit vs. the benefit
    - **Ppl respond to incentives**
      - **Ex:** gov't imposes a higher tax on cigarettes → ppl would stop smoking
  - *how people interact*
    - **Trade can make everyone better off**

      - **absolute advantage:** ability to produce a good using fewer inputs than another producer
      - **comparative advantage:** ability to produce a good at a lower opportunity cost than another producer
      - gains from trade are based on comparative advantage because both parties will benefit when they specialize in smt where both will consume more goods and reach points outside the ppf
      - **graphs:** people face trade-offs btwn certain goods b/c their budget is limited so only the points inside and on the production possibility frontier are attainable however with trade, people will specialize and obtain points outside the curve.
