significance for future studies as they allow elusive concepts typically found in TS to be worked with more coherently. Chapters are structured around two core ideas: first, the qualitative systematic analysis of source text content with emphasis on the detection of translation problems as a means of creating efficient frameworks for coherent decision making from a functional perspective; and secondly, the practical process of stereotyping and profiling specific problems within different contexts, content types or services to help identify, manage and resolve them in a number of settings, from research to professional translator training and assessment environments. This book will be of interest to scholars in translation studies, particularly those with an interest in qualitative approaches.
