## APPLICATIONS

The UB12 is purpose-designed for background/surround applications where sound quality cannot be sacrificed for the sake of visual unobtrusiveness. It is also recommended choice for modified reproduction where enhanced low frequency response is desired. UB12's compact design and comparatively high efficiency make it an effective component of large scale multi-room systems in a limited range of volumes and applications.

This 'in-ceiling' system is engineered for high quality distributed sound systems of all types. The vertical enclosure excels in efficient low frequency response. A 1" soft dome tweeter produces exceptional clarity and definition. The complex crossover uses computer-optimized asymmetrical filters to smooth on-axis frequency response as well as power response.
