

2011 AP[®] STATISTICS FREE-RESPONSE QUESTIONS**STATISTICS****SECTION II****Part A****Questions 1-5**

Spend about 65 minutes on this part of the exam.

Percent of Section II score — 75

Directions: Show all your work. Indicate clearly the methods you use, because you will be scored on the correctness of your methods as well as on the accuracy and completeness of your results and explanations.

1. A professional sports team evaluates potential players for a certain position based on two main characteristics, speed and strength.

- (a) Speed is measured by the time required to run a distance of 40 yards, with smaller times indicating more desirable (faster) speeds. From previous speed data for all players in this position, the times to run 40 yards have a mean of 4.60 seconds and a standard deviation of 0.15 seconds, with a minimum time of 4.40 seconds, as shown in the table below.

| | Mean | Standard Deviation | Minimum |
|----------------------|--------------|--------------------|--------------|
| Time to run 40 yards | 4.60 seconds | 0.15 seconds | 4.40 seconds |

Based on the relationship between the mean, standard deviation, and minimum time, is it reasonable to believe that the distribution of 40-yard running times is approximately normal? Explain.

- (b) Strength is measured by the amount of weight lifted, with more weight indicating more desirable (greater) strength. From previous strength data for all players in this position, the amount of weight lifted has a mean of 310 pounds and a standard deviation of 25 pounds, as shown in the table below.

| | Mean | Standard Deviation |
|-------------------------|------------|--------------------|
| Amount of weight lifted | 310 pounds | 25 pounds |

Calculate and interpret the z -score for a player in this position who can lift a weight of 370 pounds.

- (c) The characteristics of speed and strength are considered to be of equal importance to the team in selecting a player for the position. Based on the information about the means and standard deviations of the speed and strength data for all players and the measurements listed in the table below for Players A and B, which player should the team select if the team can only select one of the two players? Justify your answer.

| | Player A | Player B |
|-------------------------|--------------|--------------|
| Time to run 40 yards | 4.42 seconds | 4.57 seconds |
| Amount of weight lifted | 370 pounds | 375 pounds |

2011 Ap Statistics Multiple Choice

D Keegan

2011 Ap Statistics Multiple Choice:

As recognized, adventure as competently as experience nearly lesson, amusement, as with ease as arrangement can be gotten by just checking out a book **2011 Ap Statistics Multiple Choice** afterward it is not directly done, you could agree to even more around this life, on the order of the world.

We pay for you this proper as capably as simple way to get those all. We have the funds for 2011 Ap Statistics Multiple Choice and numerous ebook collections from fictions to scientific research in any way. along with them is this 2011 Ap Statistics Multiple Choice that can be your partner.
