Origami8, Volume III Guoxing Lu, Zhong You, Michael Assis, 2026-01-01 These four volumes of proceedings contain 126 papers contributed to the 8th International Meeting on Origami Science Mathematics and Education 8OSME held on 16-18 July 2024 at Swinburne University of Technology in Melbourne Australia. The papers represent current work in different disciplines of origami and they are grouped into four subject themes: Volume 1 Engineering I, Volume 2 Engineering II, Volume 3 Mathematics, Computation, History and Mental Health, and Volume 4 Design and Education. We witness increasing interests in origami from researchers, practitioners, and artists. Of special note is the rapidly growing research in origami engineering, a distinctive field with fundamental concepts and applications related to space, mechanical, material, medical, and structural engineering, etc. Participants of 8OSME should find great passion and opportunity of collaborations across disciplines of origami. We hope these four volumes will inspire not just currently active researchers and artists but also the next generation of origami scientists, mathematicians, engineers, designers, historians, and teachers.

School Library Journal, 2005 [Origami Dragons Ebook](#) Marc Kirschenbaum, 2020-09-15 Origami folders and dragon enthusiasts rejoice! Origami Dragons Kit by master origami artist Marc Kirschenbaum shows you how to fold 10 incredible paper dragon models. This unique collection contains a wide range of Asian and Western dragons, both winged and serpentine. Each one is based on dragon folklore and pop culture from around the world, including the Wyvern, a cousin of the dragon that appears in *Dungeons and Dragons* and *Game of Thrones*. This book contains detailed full-color instructions with easy-to-follow diagrams, as well as accompanying online folding videos. Here are just some of the dragon models included in this kit: The Faerie Dragon, a miniature magical dragon with distinctive butterfly-like wings; The Lindwurm, a sinewy undulating monster; The Rearing Dragon, this formidable apex predator is the most difficult model to fold; tackle this after you've completed the others; The Dragon Hatchling, they're cute at this age but watch your fingertips and keep an eye out for mama! Plus many more. These 3D creatures are fun to fold and collect, display on your shelf, and share with friends. They may look dangerous, but they eat surprisingly few villagers.
