Add graphics, color, and visual pizzazz to your web pages. Work with transparent images and background graphics. Design your site's layout and typography using CSS. Get user input with web-based forms. Publicize your site and make it search engine friendly. Test a website for compatibility with different browsers. Make your site easy to maintain and update as it grows. Use HTML5 semantic tags to better structure your pages. Create columns with CSS. Add HTML5-based video and audio to your site. Use CSS3 transforms, transitions, and animations to create great visual effects. Use HTML5's powerful form validation capability.
