- **Context of IR and E**

New ideas were spread by the media. Rationalization became relevant in society especially in religion. Everyday life was shaped by new inventions.
- **Sci Rev and Enl**
 - New ideas became prominent in physics, anatomy, math, and astronomy. Later, scientific revolution principles were applied to society and intellectual thought. New economic ideas challenged traditional ones. Human/individual rights became an increasingly popular idea. Religion was increasingly viewed as a private matter rather than a public one.
- **Enlightened and Other Approaches to Power**
 - With the limitation of sovereignty in Europe by the HRE, power shifted to Prussia. Religious toleration had been extended to most Christian minorities in most places and Jews even received equal civil liberties in some places. Some countries tested enlightened absolutism.
- **18th Cen. Society and Demographics**
 - Populations stabilized as new there became a balance in food production and population, decreased famines, and the disappearance of plague and other epidemics. New inventions for agricultural production later increased food production, and early methods of birth control started to control the population. New methods of agricultural production created less need for workers, leading families to urban areas. Rapid growth of cities strained the government's ability to provide a health environment; in addition, the concentration of poor people in cities led to increased crime and filth rates.
- **18th Cen. Culture and Arts**
 - With various opportunities to get your opinion out there, public opinion became prominent in urban areas despite the government. Censorship. Artwork began to be more depictive of the public good and private life rather than religious depictions and the power of monarchies and other forms of government. An increase of exposure to foreign things led to challenges to accepted social norms.
