Write 1-2 short paragraphs. Include: the purpose, the procedure, the results, and the conclusion. Use transitions between the information. **Include 5-6 keywords** (new information). Simply summarize the report. The entire abstract should be about 100 to 200 words and fit on one page. It is easier to write the **ABSTRACT** after you have written the entire research paper to bring every fact. You should use a graphic organizer to organize information. Use the correct scientific words.

## Table of Contents

## Procedure:

Explain step by step what you did in your experiment. Be clear about the sequence of the experiment (the things you did and the order). Be certain that each step changes the way you did the experiment. The procedure should be like a recipe. It should be clear. Write them on separate pages and include them in the report.

## Data/Results:

Your project MUST include a data table and graph. Make sure that you label your graphs clearly so that the reader can understand them. Data leads to the graph/graphs.

The Results explain, in complete form, what is shown in the data tables and graphs.

<http://www.life-now.com>

Cite all your sources in your data table.

## Conclusion:

Start with a sentence using Please, in conclusion, etc.)

This section is your evaluation and interpretation of your results. Look over your graphs, charts, tables, or data log and then write what you think the data shows or seems to indicate. You may include your opinion. It is OK to state where you might have made mistakes. Negative results are not good if you did not prove your hypothesis. They may be. What would you do differently next time?
