(1) Explain how the debit/credit rules are used when developing journal entries (10 points) and (2) provide an example of the application of the debit/credit rules in the form of a journal entry. (10 points) (Points : 20)

1. In accounting, a debit increases the balance and a credit decreases the balance. The accounts that have a normal debit balance are assets, the owner's equity, expenses and losses. Normal credit balances are liabilities, equity, revenue, and gains. When we debit an account, we raise the balance. When we credit the account, we decrease the balance. Using a double entry system, we would debit one account and credit the other to get the journal in balance.

Cash receipts might be processed through a lock-box system.
