Part I

- P:** Titanium combines readily with oxygen, nitrogen, and hydrogen, all of which have an adverse effect on its mechanical properties.
C: Titanium must be processed in their absence.
- P:** The good, according to Plato, is that which furthers a person's real interests.
C: In any given case when the good is known, men will seek it.
- P:** The denial or perversion of justice by the sentences of courts, as well as in any other manner, is with reason classed among the just causes of war.
C: The federal judiciary ought to have cognizance of all causes in which the citizens of other countries are concerned.
- P:** When individuals voluntarily abandon property, they forfeit any expectation of privacy in it that they might have had.
C: A warrantless search and seizure of abandoned property is not unreasonable under the Fourth Amendment.
- P₁:** Artists and poets look at the world and seek relationships and order.
P₂: But they translate their ideas to canvas, or to marble, or into poetic images.
P₃: Scientists try to find relationships between different objects and events.
P₄: To express the order they find, they create hypotheses and theories.
C: The great scientific theories are easily compared to great art and great literature.
- P₁:** The animal species in Australia are very different from those on the mainland.
P₂: Asian placental mammals and Australian marsupial mammals have not been in contact in the last several million years.
C: There was never a land bridge between Australia and the mainland
- P₁:** We need sleep to think clearly, react quickly, and create memories.
P₂: Studies show that people who are taught mentally challenging tasks do better after a good night's sleep.
P₃: Other research suggests that sleep is needed for creative problem solving.
C: It really does matter if you get enough sleep.
- P₁:** The classroom teacher is crucial to the development and academic success of the average student.
P₂: Administrators simply are ancillary to this effort.
C: Classroom teachers ought to be paid at least the equivalent of administrators at all levels, including the superintendent.

Thin Objects Øystein Linnebo,2018-05-23 Are there objects that are thin in the sense that not very much is required for their existence Frege famously thought so He claimed that the equinumerosity of the knives and the forks suffices for there to be objects such as the number of knives and the number of forks and for these objects to be identical The idea of thin objects holds great philosophical promise but has proved hard to explicate ystein Linnebo aims to do so by drawing on some Fregean ideas First to be an object is to be a possible referent of a singular term Second singular reference can be achieved by providing a

criterion of identity for the would be referent The second idea enables a form of easy reference and thus via the first idea also a form of easy being Paradox is avoided by imposing a predicativity restriction on the criteria of identity But the abstraction based on a criterion of identity may result in an expanded domain By iterating such expansions a powerful account of dynamic abstraction is developed The result is a distinctive approach to ontology Abstract objects such as numbers and sets are demystified and allowed to exist alongside more familiar physical objects And Linnebo also offers a novel approach to set theory which takes seriously the idea that sets are formed successively
