

Diabetes

Teaching Plan

This lesson is designed to help assisted living workers learn about diabetes. To use this lesson for self-study, the learner should read the materials, do the case study activity, and take the test. For group study, the leader should give every learner a copy of the learning guide and use the suggested group activities to teach the lesson. *Approximate lesson time: One hour.*

Learning Objectives

Participants in this activity will be able to:

1. Explain what diabetes is and does.
2. Describe the four key elements of treatment for diabetes.
3. List the symptoms of low blood sugar and high blood sugar.
4. Know how to respond to a diabetic emergency.

Teaching Tip

When lecturing, move around the room a little to provide visual interest. Focus attention by writing main points on a board.

Suggested Group Activities

Introductory Activity:

Give the learners a copy of the case study activity. Ask them to read the case studies and think about their responses. Explain that they will learn answers to these problems today.

What Diabetes Is and Does:

Go over the material in the learner guide about what diabetes is, the two types of diabetes, and the long-term effects of diabetes. You can do this as a mini-lecture. Point out that the pancreas is located behind the stomach, in front of the lower part of the backbone.

The Four Key Elements of Treatment:

Review and discuss the material together, asking learners to read portions of the lesson aloud to the others. Emphasize the points that are of particular concern in your facility.

Diabetic Emergencies:

Ask the workers to study the symptoms of low blood sugar and high blood sugar for a minute. Quiz them by calling out a symptom and asking if it means high blood sugar or low blood sugar. For fun, throw a small piece of candy to the first person to call out the correct answer. Observe that some similar symptoms occur in both conditions, but low blood sugar happens suddenly. High blood sugar symptoms usually appear gradually and become worse.

Ask the learners to tell you how to respond to each type of diabetic emergency. Be sure they know that low blood sugar can cause heart attacks and strokes if not treated promptly.

Conclusion:

Review the case studies again with the group, asking what should be done in these situations. See if their responses have changed since learning this material. Guide them to understand the correct procedures to follow in your facility, using the answer sheet to assist you.

Have the learners take the test, then grade the test together. Hand out certificates.

Diabetes Lesson Plans
