Anti-Money Laundering, Counter Financing Terrorism and Cybersecurity in the Banking Industry Felix I.

Lessambo, 2023-01-31 Despite massive investments in mitigation capabilities financial crime remains a trillion dollar global issue with impacts that extend well beyond the financial services industry Worldwide there are between 800 billion and 2 trillion laundered annually with the United States making up at least 300 billion of that figure Although it is not possible to measure money laundering in the same way as legitimate economic activity the scale of the problem is considered enormous The cybersecurity landscape is always shifting with threats becoming more sophisticated all the time Managing risks in the banking and financial sectors requires a thorough understanding of the evolving risks as well as the tools and practical techniques available to address them Cybercrime is a global problem which requires a coordinated international response This book outlines the regulatory requirements that come out of cyber laws and showcases the comparison in dealing with AML CFT and cybersecurity among the G 20 which will be of interest to scholars students and policymakers within these fields **Computer Law & Practice**, 1984 Next-Generation Enterprise Security and Governance Mohiuddin

Ahmed, Nour Moustafa, Abu Barkat, Paul Haskell-Dowland, 2022-04-19 The Internet is making our daily lives as digital as possible and this new era is called the Internet of Everything IoE The key force behind the rapid growth of the Internet is the technological advancement of enterprises The digital world we live in is facilitated by these enterprises advances and business intelligence These enterprises need to deal with gazillions of bytes of data and in today's age of General Data Protection Regulation enterprises are required to ensure privacy and security of large scale data collections However the increased connectivity and devices used to facilitate IoE are continually creating more room for cybercriminals to find vulnerabilities in enterprise systems and flaws in their corporate governance Ensuring cybersecurity and corporate governance for enterprises should not be an afterthought or present a huge challenge In recent times the complex diversity of cyber attacks has been skyrocketing and zero day attacks such as ransomware botnet and telecommunication attacks are happening more frequently than before New hacking strategies would easily bypass existing enterprise security and governance platforms using advanced persistent threats For example in 2020 the Toll Group firm was exploited by a new crypto attack family for violating its data privacy where an advanced ransomware technique was launched to exploit the corporation and request a huge figure of monetary ransom Even after applying rational governance hygiene cybersecurity configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy Therefore the threat landscape in the context of enterprises has become wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of this network In this context this book addresses the cybersecurity and cooperate governance challenges associated with enterprises which will provide a bigger picture of the

concepts intelligent techniques practices and open research directions in this area This book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation privacy and security

The Cambridge Handbook of Consumer Privacy Evan Selinger, Jules Polonetsky, Omer Tene, 2018-04-02 Businesses are rushing to collect personal data to fuel surging demand Data enthusiasts claim personal information that is obtained from the commercial internet including mobile platforms social networks cloud computing and connected devices will unlock path breaking innovation including advanced data security By contrast regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems As the Internet of Things matures and facial recognition predictive analytics big data and wearable tracking grow in power scale and scope a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis The only productive way forward is to get a grip on the key problems right now and change the conversation That is exactly what Jules Polonetsky Omer Tene and Evan Selinger do They bring together diverse views from leading academics business leaders and policymakers to discuss the opportunities and challenges of the new data economy
