review of the literature and on its author's long experience in the testing field. No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity. Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing currently under revision by AERA, APA, and NCME. Illustrative Examples. The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research.
