## College Basketball Scores Predictions:

**Intuition in Judgment and Decision Making** Henning Plessner, Cornelia Betsch, Tilmann Betsch, 2011-05-20 The central goal of this volume is to bring the learning perspective into the discussion of intuition in judgment and decision making The book gathers recent work on intuitive decision making that goes beyond the current dominant heuristic processing perspective However that does not mean that the book will strictly oppose this perspective The unique perspective of this book will help to tie together these different conceptualizations of intuition and develop an integrative approach to the psychological understanding of intuition in judgment and decision making Accordingly some of the chapters reflect prior research from the heuristic processing perspective in the new light of the learning perspective This book provides a representative overview of what we currently know about intuition in judgment and decision making The authors provide latest theoretical developments integrative frameworks and state of the art reviews of research in the laboratory and in the field Moreover some chapters deal with applied topics Intuition in Judgment and Decision Making aims not only at the interest of students and researchers of psychology but also at scholars from neighboring social and behavioral sciences such as economy sociology political sciences and neurosciences

**Who's #1?** Amy N. Langville, Carl D. Meyer, 2013-12-01 The mathematics behind today's most widely used rating and ranking methods A website's ranking on Google can spell the difference between success and failure for a new business NCAA football ratings determine which schools get to play for the big money in postseason bowl games Product ratings influence everything from the clothes we wear to the movies we select on Netflix Ratings and rankings are everywhere but how exactly do they work Who's 1 offers an engaging and accessible account of how scientific rating and ranking methods are created and applied to a variety of uses Amy Langville and Carl Meyer provide the first comprehensive overview of the mathematical algorithms and methods used to rate and rank sports teams political candidates products Web pages and more In a series of interesting asides Langville and Meyer provide fascinating insights into the ingenious contributions of many of the field's pioneers They survey and compare the different methods employed today showing why their strengths and weaknesses depend on the underlying goal and explaining why and when a given method should be considered Langville and Meyer also describe what can and can't be expected from the most widely used systems The science of rating and ranking touches virtually every facet of our lives and now you don't need to be an expert to understand how it really works Who's 1 is the definitive introduction to the subject It features easy to understand examples and interesting trivia and historical facts and much of the required mathematics is included
